1. Introduction

Cross Video Gallery 6.6 is an enterprise-class DNN module that enables multi-user to publish videos/audio and attach images/documents as easy as ABC. It includes 13 sub modules which offer many cool features, as follows:

1. Powerful yet easy to use, v6.5 introduces a new setup wizard to guide you to configure module step by step, all you need to do is just click “Next” to follow this wizard.

2. Supports both HTML5 & Flash player to play videos/audio. It automatically selects the best playback for your viewer's device and browser, so you deliver unparalleled video/audio experience on iPhone, iPad, Android, Mobile, and the Desktop.

3. Video/audio can be from site file, embed code, or external urls (like YouTube) and RTMP streaming. They can be published as stand-alone media, or publish as serials so visitors can watch/listen them one by one. Module also supports ad video.

4. Automatic imports YouTube videos (like YouTube popular, user upload / user favorite / user play list, or search based certain condition) into user video list. And use YouTube’s iFrame API to play YouTube content on iOS and Android devices, so they can be watched on both PC and Mobile.

5. Multiple users support, authorized users can post their own videos/audio and attach photos/documents with media. Each user can manage his files. Module supports automatic conversion of user uploaded videos to .flv or .mp4 (h264) format.

6. Template-driven layout and design. All sub modules are template based, module already includes 5 built-in templates, and you can create your own templates if necessary.

7. Responsive layout support, so in combination with responsive skins they will adjust to smartphone and tablet screens.

8. Display videos/audio with data list, data grid, JavaScript slideshow (9 effects), and Adobe Flash slideshow.

9. Create extra media attributes, or disable unwanted video/audio attributes as your wish.

10. The new advanced search feature allows you to specify the search conditions, you can search based every built-in data fields and custom attributes which you create. Also fully integrates with DNN built-in search mechanism.

11. Upload multiple/large files at one time using Ms Silverlight upload control.

12. RSS/Email integration.

13. There are 13 sub modules in package, but all data are manage via 1 single

Copyright © 2014 – DnnModule.com – All Rights Reserved

module (CrossVideo_Admin), the other 12 sub modules are used to display related data.

14. Fully integrate with DNN built-in journal. When a new video/audio/comment is created, it will automatic be added in author journals.

15. Integrate with DNN built-in social, author can share video/audio to his/her friends/followers and groups.

16. SEO friendly url / Google website map / Google video sitemap support to let search engines to index your videos/audio more easily.

17. Google Maps / Amazon Simple Storage Services (Amazon S3) integration.

……..

Visit http://DnnModule.com/FreeDownload.aspx to download 60 days trial version which can be installed on official domain names. And visit dnnmodule.com/Modules/CrossVideoGallery/DNNVideoGalleryModule.aspx and http://dnnmodule.com/Modules/CrossVideoGallery/DNNAudioGalleryModule.aspx for live demo.

Note, Cross Video Gallery v6.6 requires DNN 7.3+ (7.3.0 – 7.3.3 are all tested) to run. If your sites are still under DNN 5.x/6.x/7.0/7.1/7.2, please check other old versions at http://DnnModule.com.

2. What's new in *v6.6*

1. Rebuild based DNN 7.3.
2. Use YouTube's iFrame API to play YouTube content on iOS and Android devices, so they can be watched on both PC and Mobile.
3. Closed Captions, preview image, chapter markers supported.
4. 4 new slideshow effects added.
5. Improve load speed.

3. Requirements

1. DNN 7.3.0+ (7.3.0 – 7.3.3 are all supported).
2. Sql server 2008/2012 or sql express 2008/2012.
3. Asp.net framework 4.0+.

Copyright © 2014 – DnnModule.com – All Rights Reserved

4. Quick Start (with setup wizard)

V6.5 introduces a new setup wizard to guide you to configure module step by step, we strongly recommend new user to choose this method, it will save you a lot of time. With it, you only need 2 steps to setup Cross Video Gallery module.

Step 1. Install module.

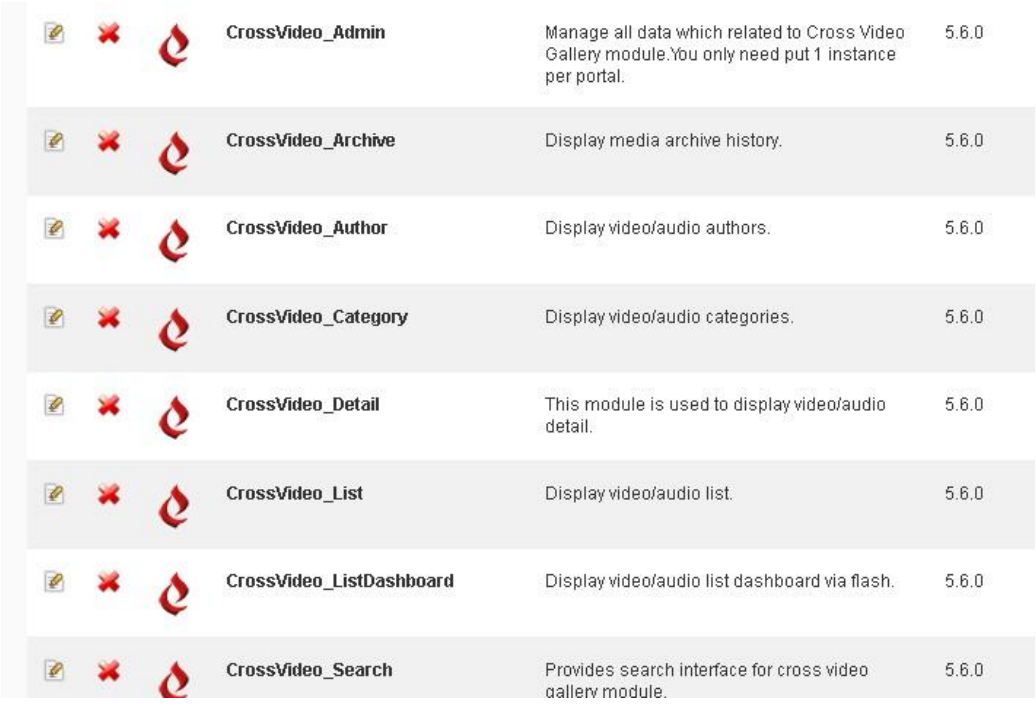
Step 2. Follow setup wizard to configure module.

4.1 Step 1: Install module

If you already bought module, unzip package which you download, you will see CrossVideoGallery 6.6 Pa(Standard).zip (or CrossVideoGallery 6.6 Pa(Enterprise).zip if you bought enterprise edition), choose it as install package.

If you want to trial module first, you can download "CrossVideoGallery 6.6 trial package.zip" at http://DnnModule.com/FreeDownload.aspx. Unzip it you will see CrossVideoGallery 6.6 Pa(trial).zip. The trial package can be installed on official domain names for 60 days.

Click "Host - Extensions - Install extension wizard" to install module. After installation, you will see 13 sub modules.



CrossVideo_Admin	Manage all data which related to Cross Video Gallery module.You only need put 1 instance per portal.	5.6.0
CrossVideo_Archive	Display media archive history.	5.6.0
CrossVideo_Author	Display video/audio authors.	5.6.0
CrossVideo_Category	Display video/audio categories.	5.6.0
CrossVideo_Detail	This module is used to display video/audio detail.	5.6.0
CrossVideo_List	Display video/audio list.	5.6.0
CrossVideo_ListDashboard	Display video/audio list dashboard via flash.	5.6.0
CrossVideo_Search	Provides search interface for cross video gallery module.	5.6.0

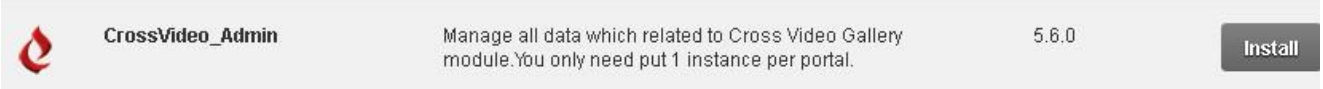
Install via Ftp

The install package is about 8mb in size. If you have problem uploading by click "Host - Extensions - Install extension wizard", there is an alternative installation option you can use. Please use the following procedure:

Copyright © 2014 – DnnModule.com – All Rights Reserved

1. Upload CrossVideoGallery 6.6 Pa(Standard).zip to Install\Module folder of your site using ftp tools.

2. Click “Host - Extensions” followed by clicking the “Available Extensions” tab. Install “CrossVideo_Admin” which is under the “Modules” section. Click the “Install” button to install.

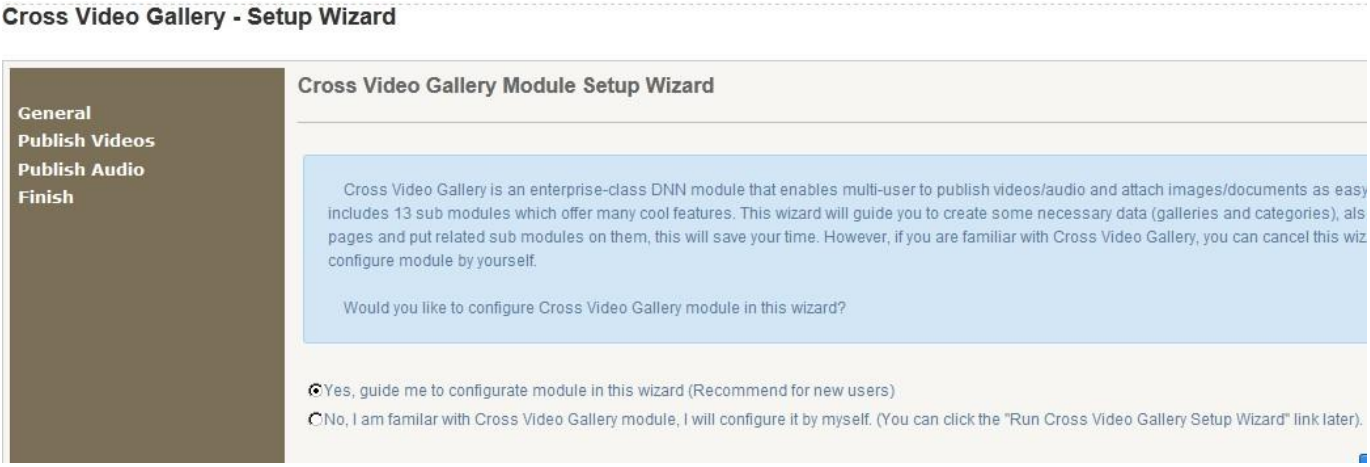


CrossVideo_Admin
Manage all data which related to Cross Video Gallery module.You only need put 1 instance per portal.
5.6.0
Install

Note, if you upgrade from trial version to official version. You don’t need to uninstall trial version first, simply re-install official package to overwrite existing trial files, your existing data will be kept after upgrade.

4.2 Step 1: Follow setup wizard to configure module

Add one of the 13 sub modules to a page (e.g. CrossVideo_Admin, CrossVideo_Archive, or any other sub modules, it doesn’t care which sub module you choose). Cross Video Gallery will detect that you are the first time to run it on current site, and will display a setup wizard to help you to configure it. Like below:



Cross Video Gallery - Setup Wizard
General
Publish Videos
Publish Audio
Finish
Cross Video Gallery Module Setup Wizard
Cross Video Gallery is an enterprise-class DNN module that enables multi-user to publish videos/audio and attach images/documents as easy
includes 13 sub modules which offer many cool features. This wizard will guide you to create some necessary data (galleries and categories), als
pages and put related sub modules on them, this will save your time. However, if you are familiar with Cross Video Gallery, you can cancel this wiz
configure module by yourself.
Would you like to configure Cross Video Gallery module in this wizard?
Yes, guide me to configurate module in this wizard (Recommend for new users)
No, I am familar with Cross Video Gallery module, I will configure it by myself. (You can click the "Run Cross Video Gallery Setup Wizard" link later).

Setup Wizard

All you need to do is follow the wizard, click “Next”, module will generate necessary system data (e.g. Galleries / Categories) and create related pages. After that, it will show links to let you to publish videos/audio and view them. It is so easy.

5. Quick Start (without setup wizard)

Cross Video Gallery contains 13 sub modules. When you put any sub module to a page for the first time, Cross Video Gallery will show a "Cross Video Gallery Module Setup Wizard" to help you to setup it. We strongly recommend you to follow this wizard,

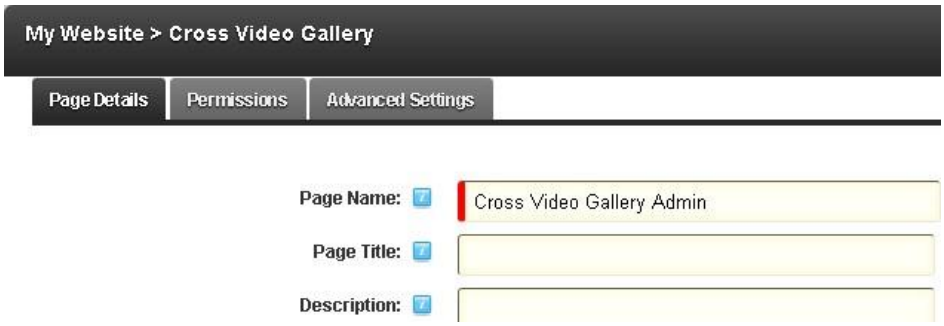
Copyright © 2014 – DnnModule.com – All Rights Reserved

it will save you a lot of time. However, if you want to setup it by yourself, you can cancel that wizard, and follow below steps:

Step 1. Add CrossVideo_Admin sub module to manage data.
Step 2. Add a gallery.
Step 3. Add a video.
Step 4. Add CrossVideo_List sub module to display videos.

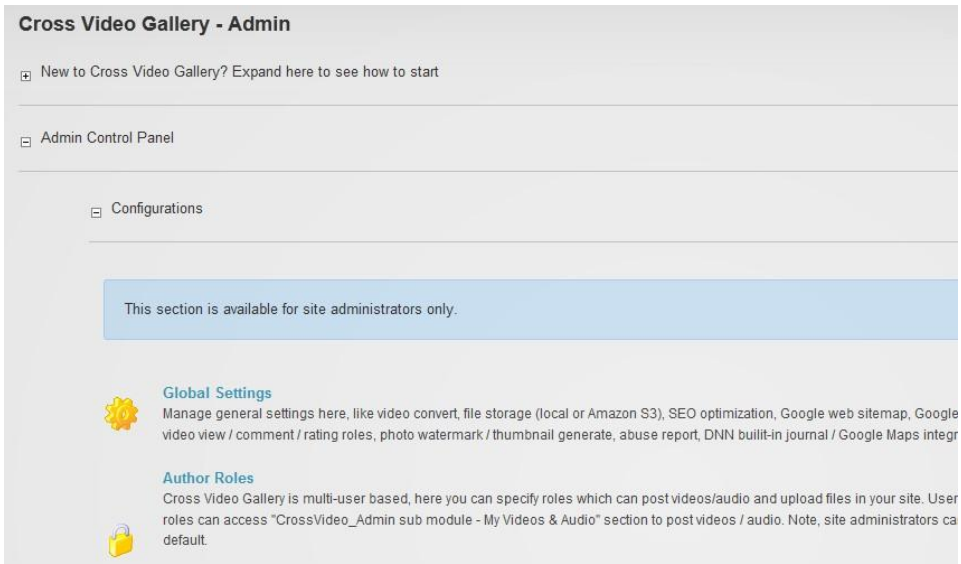
5.1 Step 1: Add CrossVideo_Admin sub module to manage data

First, you may need to create a page before add CrossVideo_Admin sub module to it. Like below:



Create “Video Admin” page.

After that, add CrossVideo_Admin sub module to the page. This module is used to manage all data in Cross Video Gallery package. You only need 1 instance per portal.



Cross Video Gallery - Admin

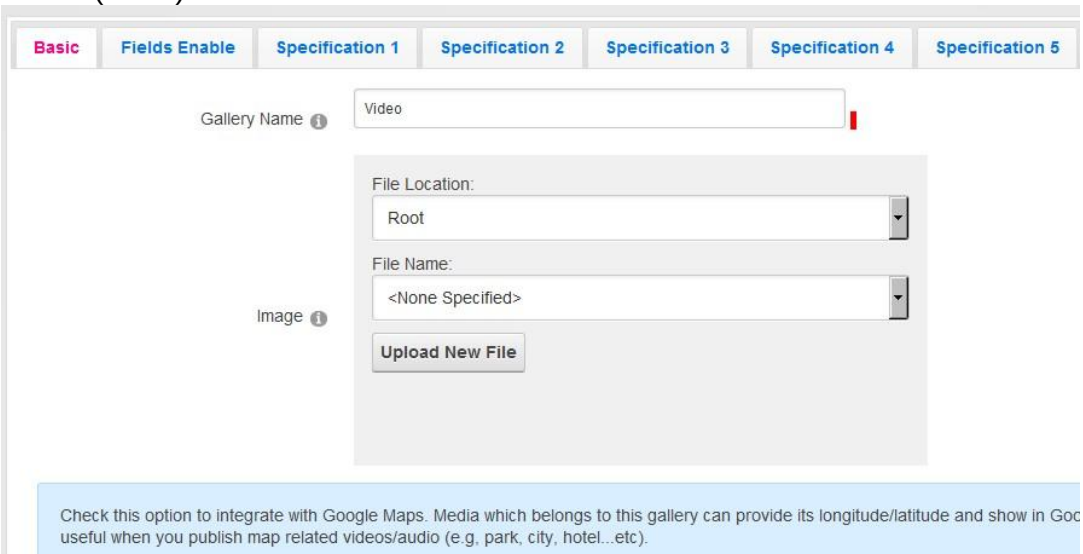
Cross Video Gallery is multi-user based, here you can specify roles which can post videos/audio and upload files in your site. User
roles can access "CrossVideo_Admin sub module - My Videos & Audio" section to post videos / audio. Note, site administrators ca
default.

5.2 Step 2: Add a gallery

Click “Admin Control Panel – System Data - Galleries“ to add galleries. Galleries are top-level unit to organize data. Each gallery has its own categories / attributes / tags /

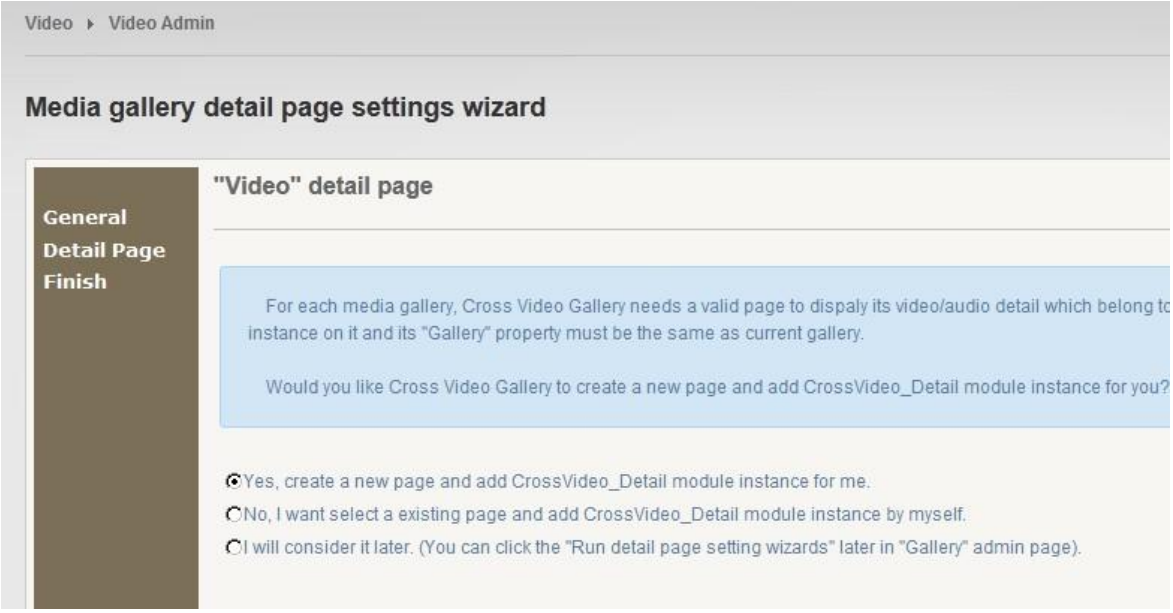
Copyright © 2014 – DnnModule.com – All Rights Reserved

videos (audio).



Please note, the default media type is “Video”, means user can only post videos (flv, mp4, webm..etc) to it. If you want to also post audio (mp3, ogg, aac….etc), you need to create another gallery which media type is “Audio”.

Each gallery needs a separate page to display videos/audio detail which belongs to it. That page must have a CrossVideo_Detail sub module on it. Module will display a wizard page to guide you create it when you create a new gallery.



Video ▸ Video Admin
Media gallery detail page settings wizard
General
Detail Page
Finish
"Video" detail page
For each media gallery, Cross Video Gallery needs a valid page to dispaly its video/audio detail which belong to
instance on it and its "Gallery" property must be the same as current gallery.
Would you like Cross Video Gallery to create a new page and add CrossVideo_Detail module instance for you?
Yes, create a new page and add CrossVideo_Detail module instance for me.
No, I want select a existing page and add CrossVideo_Detail module instance by myself.
I will consider it later. (You can click the "Run detail page setting wizards" later in "Gallery" admin page).

Note, you can also run that wizard by click “Run detail page setting wizards “button later.

Tips: some people may ask “why do we need to create gallery?” Well, gallery is mainly used to organize attributes / categories. For example, if you use Cross Video Gallery to publish both videos and audio, you may need to create different attributes for

Copyright © 2014 – DnnModule.com – All Rights Reserved

videos and audio, and you also need different categories to organize them. Gallery lets you solve this problem easily.

5.3 Step 3: Add videos

Now you can add videos in “CrossVideo_Admin sub module - My Videos & Audio – My stand alone videos & audio”, you may need to upload video/audio/image/document files in “My Videos & Audio – My Files” first. For quick start, let us add a video from embed code as example.

Click “My Videos & Audio – My stand alone videos & audio”, click “Add Video/Audio” button, enter a video title, choose “File Type “ as “Embed code “, as below.

You can copy below content as embed code

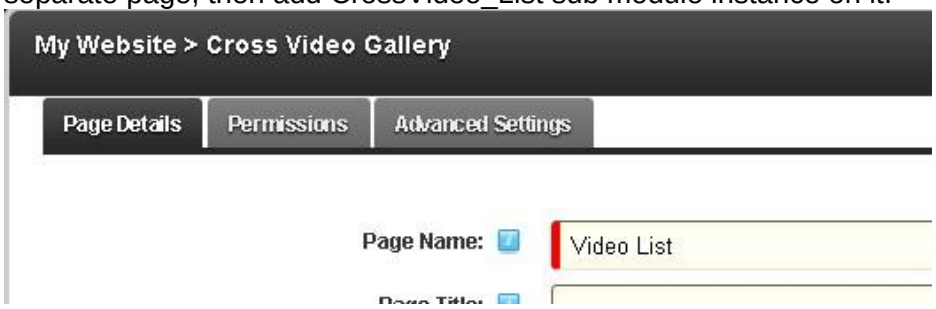
<embed src="http://player.youku.com/player.php/sid/XOTM3MTA2MA==/v.swf" quality="high" width="480" height="400" align="middle" allowScriptAccess="sameDomain" type="application/x-shockwave-flash"></embed>

After that, click “Update” to save video.

Cross Video Gallery supports both HTML5 & Flash player to play videos/audio. It automatically selects the best playback for your viewer's device and browser, so you deliver unparalleled video/audio experience on iPhone, iPad, Android, Mobile, and the Desktop. You will see a "Video/Audio format support" tab while add videos/audio, please read it first before add your media.

5.4 Step 4: Use CrossVideo_List sub module to display videos.

Now you can use CrossVideo_List sub module to show videos. First, create a separate page, then add CrossVideo_List sub module instance on it.



You can add multiple instances of “CrossVideo_List sub module” to the page as your wish. Click “media list settings” action menu you will see a lot of control options to control the layout of video list.

Copyright © 2014 – DnnModule.com – All Rights Reserved

Congratulations! Now try clicking a video in “CrossVideo_List sub module”, you will see it will be played well.

6. Introduce 13 sub modules

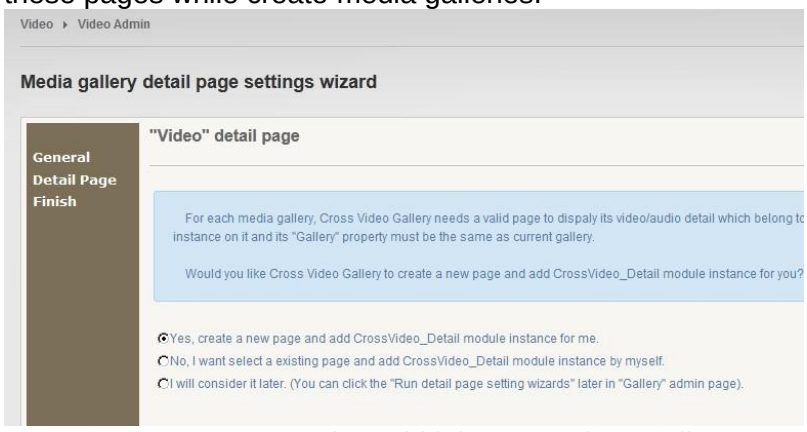
There are 13 sub modules in Cross Video Gallery package. Besides "CrossVideo_Admin" sub module (which is mainly used for manage purpose, and should have only 1 instance per portal), the other 12 sub modules are all used to display related data.

For example, you can put "CrossVideo_Tag" module on a page to show media tags, put "CrossVideo_Category" module to show categories...etc. Unlike "CrossVideo_Admin" sub module, you can add multiple instances of other 12 sub modules to different pages (or on same page if you like). These 12 sub modules are all template based, you can build your own templates to show related data if you don't like the default layout. They can also support responsive layout, so in combination with responsive skins they will adjust to smartphone and tablet screens.

The frequently-used sub modules are CrossVideo_List (show media with data list or data grid), CrossVideo_Slideshow (show featured media with JavaScript slideshow), CrossVideo_ListDashboard (show featured media with Adobe Flash slideshow), CrossVideo_Search (provide search function), and CrossVideo_Category (show categories), CrossVideo_TagList (show tags). Other sub modules are also useful in some situations.

6.1 CrossVideo_Detail sub module

Using this module to display video/audio detail information, you need to add a CrossVideoVideo_Detail sub module instance for every video/audio gallery. However, you don't’ need worry about it. Module will display a wizard page to guide you to create these pages while create media galleries.

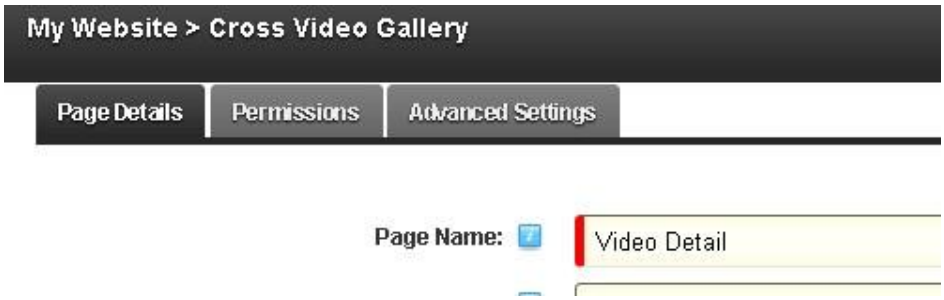


Video ▸ Video Admin
Media gallery detail page settings wizard
General
Detail Page
Finish
"Video" detail page
For each media gallery, Cross Video Gallery needs a valid page to dispaly its video/audio detail which belong to
instance on it and its "Gallery" property must be the same as current gallery.
Would you like Cross Video Gallery to create a new page and add CrossVideo_Detail module instance for you?
Yes, create a new page and add CrossVideo_Detail module instance for me.
No, I want select a existing page and add CrossVideo_Detail module instance by myself.
I will consider it later. (You can click the "Run detail page setting wizards" later in "Gallery" admin page).

Of course, you can also add it by yourself, as follows:

A: Create a video detail page

Copyright © 2014 – DnnModule.com – All Rights Reserved



Make sure page can be viewed by all users. If you don't want this page displaying on menu, you can uncheck "include in menu", to hidden it.

After page creation, add CrossVideo_Detail sub module to this page. And click "Media detail settings" to customize its layout.

6.2 CrossVideo_List sub module

Use this module to display videos/audio with data list or data grid, click "Media list settings" to customize it.

6.3 CrossVideo_Slideshow sub module

Display videos/audio with JavaScript slideshow, supports 9 slideshow effects.

6.4 CrossVideo_ListDashboard sub module

Display video/audio list via Adobe Flash slideshow.

6.5 CrossVideo_Search sub module

Provide media search function.

6.6 CrossVideo_Taglist sub module

Display media tag list.

6.7 CrossVideo_TagDashboard sub module

Display media tag via Adobe Flash slideshow

Copyright © 2014 – DnnModule.com – All Rights Reserved

6.8 CrossVideo_Author sub module

Display media creator list, it is useful if you have many users publish videos/audio in site.

6.9 CrossVideo_Archive sub module

Display media archive history by month and date.

6.10 CrossVideo_Type sub module

Display media galleries (media type). For some reason, we call gallery as “type” in previous versions. In v5.7, we change type as “gallery” based customer’s feedback.

6.11 CrossVideo_Category sub module

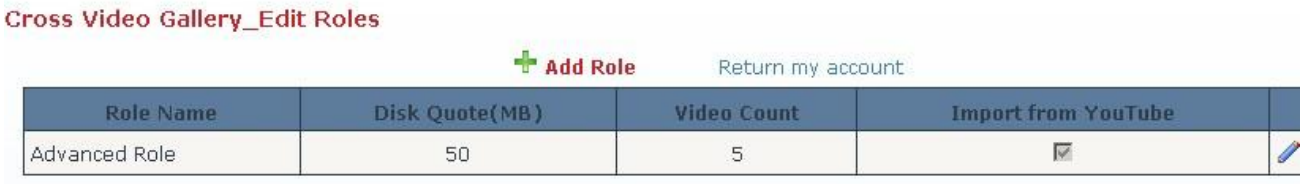
Display media categories.

6.12 CrossVideo_WatchHistory sub module

Show registered user watch history.

7. Multiple users support

By default, only site administrator can post videos/audio. If you want to enable other users to post videos/audio, you can click “CrossVideo_Admin sub module - Admin Control Panel - Configurations - Author Roles” to add roles which can post videos/audio. You can specify their disk quota and video/audio count.



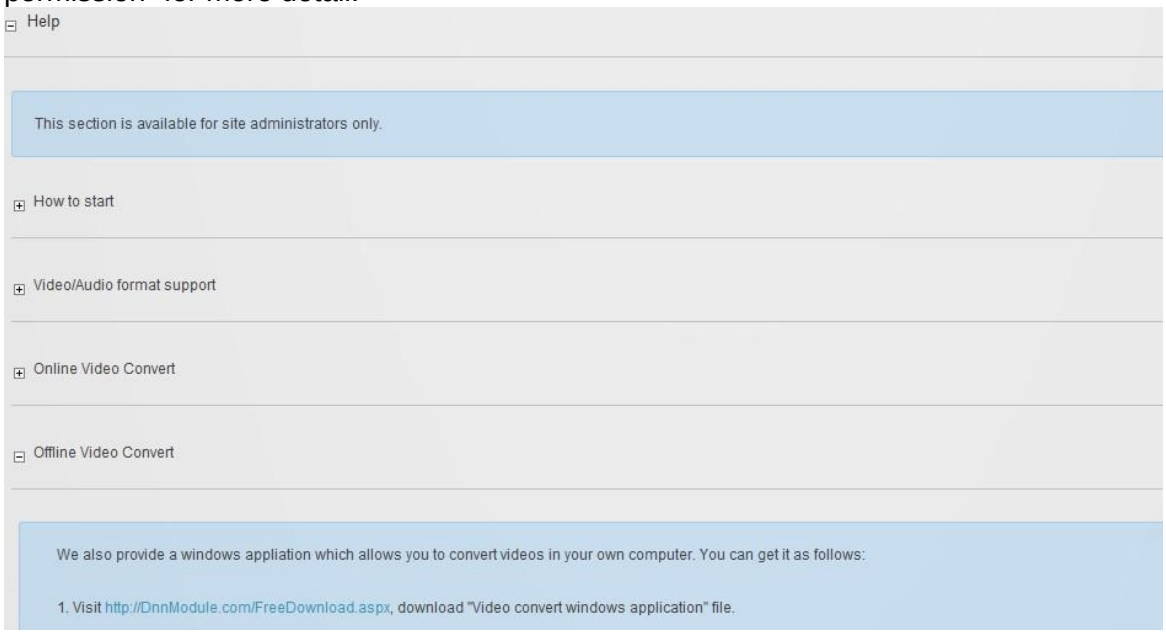
8. Advanced Configurations

Cross Video Gallery module introduces a lot of powerful features which haven’t seen in other competitor modules. Instead of write long and complicated help document to explain every detail of them. We choose to integrate this information directly into module interface. Below are some important areas which you need to read before use this module.

Copyright © 2014 – DnnModule.com – All Rights Reserved

8.1 Convert video to .flv and h264 (.mp4) online/offline

Expand “CrossVideo_Admin sub module - Help – Online / Offline Video convert permission” for more detail.

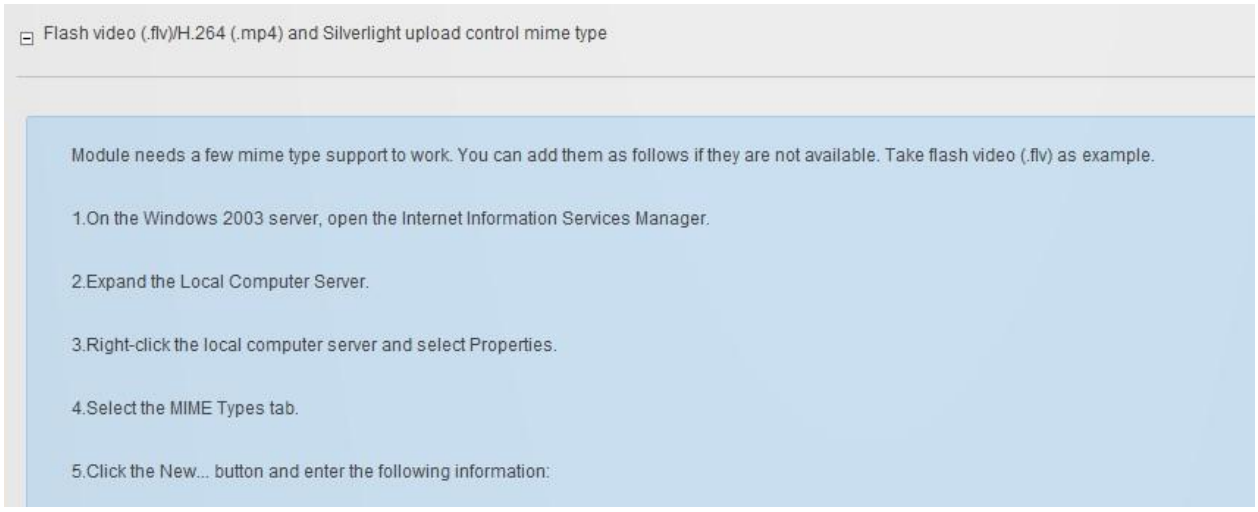


Help
This section is available for site administrators only.
How to start
Video/Audio format support
Online Video Convert
Offline Video Convert
We also provide a windows appliation which allows you to convert videos in your own computer. You can get it as follows:
1. Visit http://DnnModule.com/FreeDownload.aspx, download "Video convert windows application" file.

Note, we strongly recommend to choose video convert target as h264 (.mp4) format because these videos can be watched via mobiles like iPhone/iPad/Android/Nokia…

8.2 Upload large files and play .flv/.mp4 video files.

Expand “CrossVideo_Admin sub module - Help – mime type” to see how to configure it:

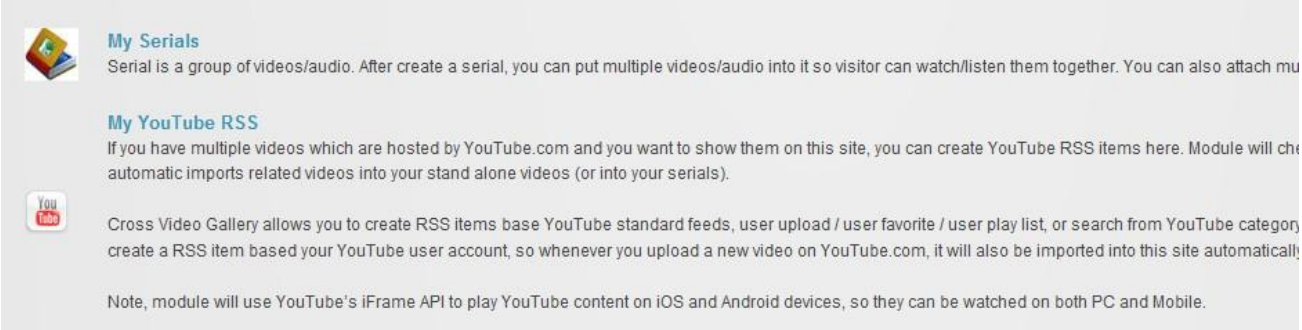


Flash video (.flv)/H.264 (.mp4) and Silverlight upload control mime type
Module needs a few mime type support to work. You can add them as follows if they are not available. Take flash video (.flv) as example.
1.On the Windows 2003 server, open the Internet Information Services Manager.
2.Expand the Local Computer Server.
3.Right-click the local computer server and select Properties.
4.Select the MIME Types tab.
5.Click the New... button and enter the following information:

Copyright © 2014 – DnnModule.com – All Rights Reserved

8.3 Retrieve YouTube videos.

Expand “CrossVideo_Admin sub module – My Videos & Audio” section, you can create YouTube RSS items and retrieve videos from them.



My Serials
Serial is a group of videos/audio. After create a serial, you can put multiple videos/audio into it so visitor can watch/listen them together. You can also attach mu

Note, module will use YouTube's iFrame API to play YouTube content on iOS and Android devices, so they can be watched on both PC and Mobile.

8.4 Disable unwanted fields

Media has some built-in fields, like author/source/image, etc. If you don't need these fields, you can disable them in “CrossVideo_Admin sub module - Admin control panel – System Data – Galleries”. If a field is disabled, it will not be displayed on video/audio edit interface which belong to current media gallery. Of course, it will also disappear in video list and detail sub modules too.

Enable "Quote" Field

8.5 Create extra fields (for long content)

Module has a built-in filed: “media detail”, it allows you to publish long content (text/html content). Besides that, module also supports up to 5 additional fields to let you publish long content (text/html content). You can enable them in “CrossVideo_Admin sub module - Admin control panel – System Data – Galleries”. You can specify its title and default value. If a field is enabled, it will be displayed on video/audio edit interface and detail module which belong to current gallery.

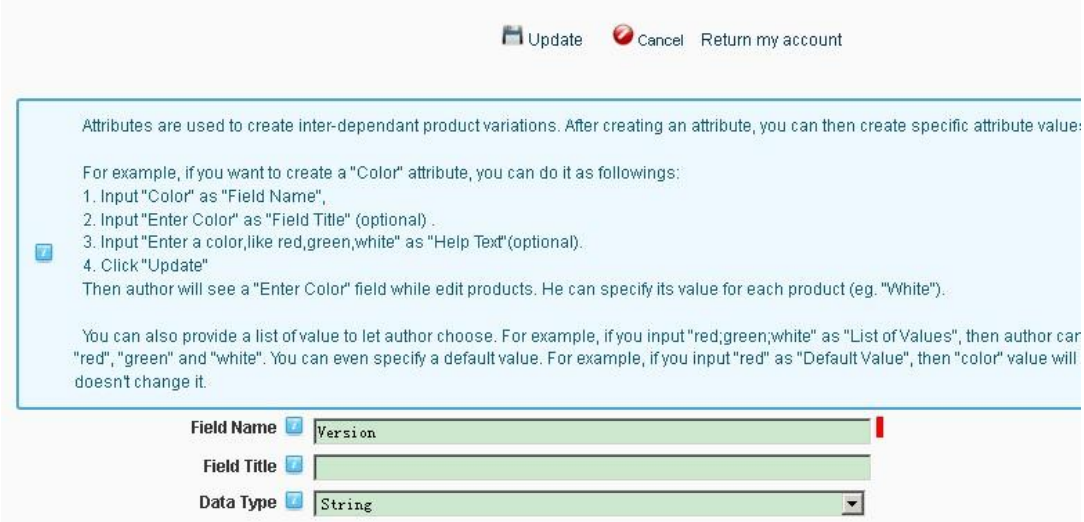
8.6 Create extra fields (for short content)

You can use “CrossVideo_Admin sub module - Admin control panel – System Data – Attributes” feature to create extra data fields. You can create attributes of varied data type like string/date/time/decimal/integer/image/url/email, and specify its title / default value / help text / validate rules / edit style, you can also provide a list of value to let author choose while editing. After create a field, it will be treated like the built-in fields. It can be displayed in CrossVideo_List and CrossVideo_Detail sub modules.

Note, while “Admin control panel – System Data – Attributes” feature can also be used to create text/html filed (to store long content), we don’t recommend you to do that. Instead, we recommend you to use additional fields in “Admin control panel – System Data – Galleries” feature to handle long content. (See section 8.5).



Update
Cancel
Return my account
Attributes are used to create inter-dependant product variations. After creating an attribute, you can then create specific attribute value
For example, if you want to create a "Color" attribute, you can do it as followings:
1. Input "Color" as "Field Name",
2. Input "Enter Color" as "Field Title" (optional) .
3. Input "Enter a color,like red,green,white" as "Help Text"(optional).
4. Click "Update"
Then author will see a "Enter Color" field while edit products. He can specify its value for each product (eg. "White").
You can also provide a list of value to let author choose. For example, if you input "red;green;white" as "List of Values", then author car
"red", "green" and "white". You can even specify a default value. For example, if you input "red" as "Default Value", then "color" value will
doesn't change it.

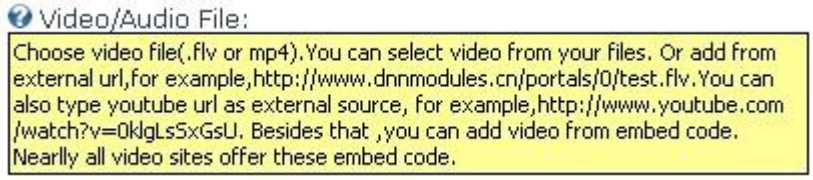
8.7 Other detail information

We provide as detail as possible information for every fields via DNN standard help label. Whenever you feel confusion, click the left help button of field, you will see more detail information. Like below:



Video/Audio File:
Choose video file(.flv or mp4).You can select video from your files. Or add from external url,for example,http://www.dnnmodules.cn/portals/0/test.flv.You can also type youtube url as external source, for example,http://www.youtube.com/watch?v=0klgLsSxGsU. Besides that ,you can add video from embed code. Nearlly all video sites offer these embed code.

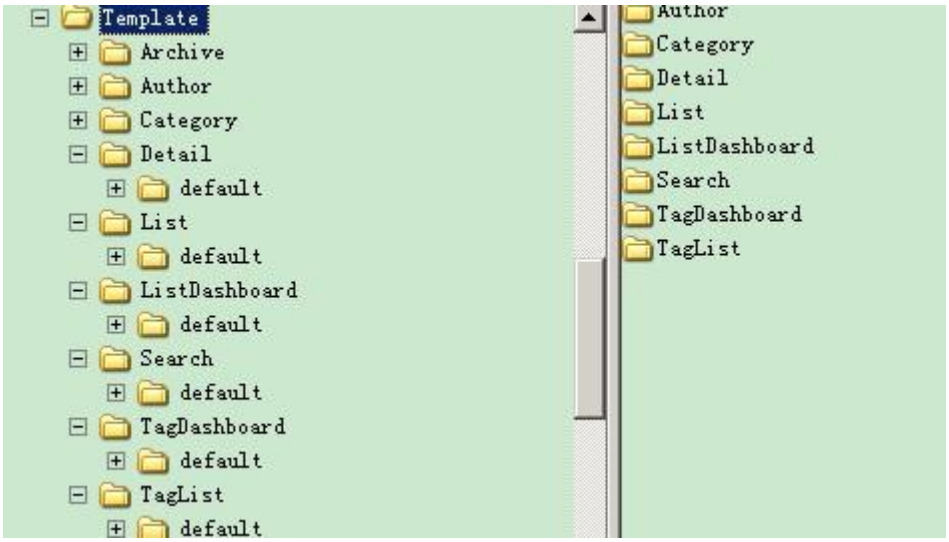
9. How to write templates

There are 13 sub modules in Cross Video Gallery package. Besides CrossVideo_Admin sub module (which is used to manage data), the other 12 sub modules are used to display related data and they are all template based, you can customize your desired display effect by create different templates.

9.1 Templates are ascx files

All the templates are ascx files. To write a template, you need to be familiar with asp.net syntax.

9.2 Template directory structure



Template files should be put under related directory.

9.3 Template create steps

Take video list template as example.

Copyright © 2014 – DnnModule.com – All Rights Reserved

1. Create a folder under DesktopModules\CrossVideo\Template\List directory, name it as “MyList”, for example.

2. Copy DesktopModules\CrossVideo\Template\List\default\App_LocalResources directory and DesktopModules\CrossVideo\Template\List \default\ VideoList_Standard.ascx file to MyList folder.

3. Change VideoList_Standard.ascx file name as your wish, for example, “MyList.ascx”. Of course, you can keep its original file name if you wish.

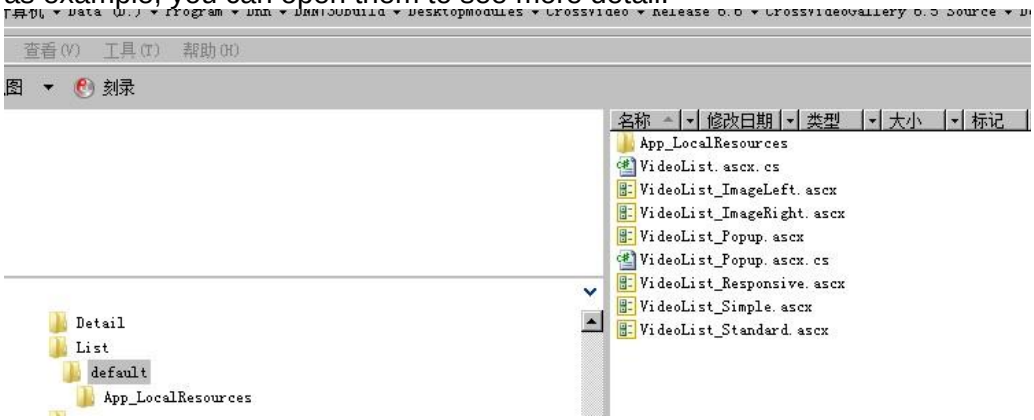
4. Open MyList.ascx file via Visual studio 2008 or something else, change its content. Note, you need to be familiar with asp.net syntax before change it.

5. Add CrossVideo_List module instance to page, click “Media list settings”, in “General – template”, select “MyList.ascx”.

6. Now module will use your own template to display.

Of course, you can put your own templates under DesktopModules\CrossVideo\Template\List\default directory if you like.

We have put 5 templates under DesktopModules\CrossVideo\Template \List \default as example, you can open them to see more detail.



Note, the templates can also support responsive layout, so in combination with responsive skins they will adjust to smartphone and tablet screens. In v6.5, we create a new template for CrossVideo_List sub module - DesktopModules\CrossVideo\Template\List\default\VideoList_Responsive.ascx which supports responsive layout. You can use it as a reference.

In v6.6, we also created a template for CrossVideo_Detail sub module (DesktopModules\CrossVideo\Template\Detail\default\VideoDetail_Responsive.ascx), to support responsive video player.

Tips: module provides a method – GetUDFieldValue to let you to get custom attribute values in CrossVideo_List sub module template. This method is very helpful if you want to show custom attribute in your media list template.

Copyright © 2014 – DnnModule.com – All Rights Reserved

Its signature is protected string GetUDFieldValue(string fieldName, string videoId). For example, if you create a “color“ attribute in “CrossVideo_Admin sub module – Admin control panel – System Data – Attributes”, you can get its value for a video (suppose its id is 10) as follows:

GetUDFieldValue(“color”,”10”)

This method (GetUDFieldValue) is also available in CrossVideo_Detail sub module template. However, its signature becomes as GetUDFieldValue(string fieldName) in CrossVideo_Detail module template, doesn’t need videoId parameter.

For more information, please see our forum (http://DnnModule.com).

10 Uninstall module

Please follow below steps to uninstall Cross Video Gallery package.

1. Click “Host - Extensions “, click the ✕ button to uninstall CrossVideo_WatchHistory ..... to CrossVideo_Archive sub modules one by one

CrossVideo_Admin	Manage all data which related to Cross Video Gallery module.	5.1.0	Yes
CrossVideo_Archive	Display media archive history.	5.1.0	Yes
CrossVideo_Author	Display video/audio authors	5.1.0	No

13 Support

You can visit our support forum at http://DnnModule.com/Forum.aspx or mail to xiaoqi98@msn.com for directly help.

14 Acknowledgments

Video convert engine is based two GNU projects:

1. ffmpeg at http://www.ffmpeg.org
2 . MPlayer at http://www.mplayerhq.hu/

We learn a lot of from below modules while developing this module:

1. Silverlight file upload module from Michael Washington
2. DNN official module - Form and list

15 Faqs

Q. How to upgrade from trial version to official version?

A. Simply re-install official version to overwrite existing trial version, module will keep your existing data after upgrade.

Q. How to register my module?

Copyright © 2014 – DnnModule.com – All Rights Reserved

A: If you bought standard edition of Cross Video Gallery module, you need to register your copy by provide invoice id. As follows:

1. In “CrossVideo_Admin” sub module, click “Register Cross Video Gallery Module”, enter your invoice id, and click “Register”.

2. If you install module on test sites, don’t register it.

3. Unregistered copy of standard edition only allows you to add 50 video/audio items.

4. Enterprise edition and enterprise + source edition don’t require register.

Q. The captcha image doesn’t show in media detail, how to solve it?

A: It occurs in some DNN version with asp.net 4.0, check DNN forum at http://www.dotnetnuke.com/Resources/Forums/tabid/795/forumid/190/postid/394250/scope/posts/Default.aspx#394250. to see how to fix it.

Q. Why the video detail doesn’t display correctly?

A. Click “CrossVideo_Admin sub module - System Data – Gallery”, check its “CrossVideo_Detail sub module page” property. That page must have a CrossVideo_Detail sub module instance on it and its “media gallery” settings must be the same as current gallery. You can click the “Run type detail page settings wizard “to configure it.

Q: I want to approve videos/audio before display, how can I do that?

A: Click "CrossVideo_Admin sub module - Admin Control Panel - Configurations - Global Settings", check on "General - Approval media before display" option.

Q: Why I can’t watch my videos using iPhone/iPad?

A: Make sure your video is h264 (.mp4) format. Currently there is no way to play .flv videos in iPhone/iPad.

Q: I don't want to allow author to attach documents (images) to his videos/audio, how can I do that?

A: Click "CrossVideo _Admin module - Admin Control Panel - Configurations - Global Settings", you will see "Enable attach documents/ Enable attach images” options under "General" section, uncheck them will hide related functions. For example, if you uncheck "Enable attaches images" option, then "add related images" button will disappear when author edit his videos/audio.
